SUMMARY

Full Stack Developer with 7+ years building production software — from enterprise ASP.NET Core and Angular platforms (ERP, aviation logistics, manufacturing) to AI-integrated Chrome extensions and SaaS products. Currently full-time at Liftoff Company Inc., shipping LLM-backed features with Cursor and Claude Code in the daily loop. Strong on legacy modernization, async collaboration across time zones, and turning tangled business logic into maintainable code.

CORE SKILLS

- **Backend:** C#, ASP.NET Core, ASP.NET Framework, Web API, Entity Framework, WCF
- **Frontend:** Angular, TypeScript, JavaScript, React / Next.js, Tailwind CSS, HTML, CSS, Svelte / SvelteKit, Bootstrap, Kendo UI
- **AI / LLM:** OpenAI API, Claude API, Gemini API, LLM integration, prompt engineering, RAG / embeddings, MCP, n8n
- **AI-assisted dev tooling:** Cursor, Claude Code, GitHub Copilot, ChatGPT, v0 / Bolt
- **Data & BaaS:** SQL Server, T-SQL, PostgreSQL, Supabase, Xano
- **Cloud & DevOps:** Azure, AWS, Digital Ocean, Vercel, Cloudflare, Git, Azure DevOps
- **Practices:** Agile / Scrum, code review, unit testing, Chrome extension development

PROFESSIONAL EXPERIENCE

Liftoff Company Inc. — Software Developer

March 2025 – Present · Remote *Part-time collaboration: October 2021 – March 2025 (converted to full-time)*

- Maintain and extend a suite of Chrome extensions used in production.
- Design and ship features across several SaaS products with heavy AI integration.
- Integrate LLM APIs (OpenAI, Claude, Gemini) into product workflows.
- Work primarily with AI-native tooling — Cursor and Claude Code — as the daily driver for development.
- Collaborate async with a small, distributed team.
- **Impact:** Shipped AI-powered features into production Chrome extensions; significantly reduced feature turnaround time through AI-assisted workflows.

Nowcom Global Services — Mid Software Engineer III

December 2022 – March 2025 · Remote

- Collaborated with stakeholders to gather requirements and propose technical solutions.
- Designed and developed .NET-based enterprise applications, integrating third-party and in-house systems.
- Revamped an in-house legacy application using .NET and Angular.
- Worked with Agile teams and performed code reviews.
- Stayed current with cloud, .NET platform, and web development tooling.
- **Impact:** Modernized legacy applications, improving performance by ~40%; mentored junior developers on best practices and code reviews.

Yondu Inc. – Software Engineer

January 2022 – December 2022

- Translated technical designs into functional code for backend and frontend.
- Implemented efficient program logic and data manipulation.
- Developed and maintained unit tests.
- Diagnosed and resolved software issues promptly.
- Managed project source-code repositories.
- **Impact:** Maintained a 100% on-time project delivery record; raised code coverage by ~60% through a deliberate unit-testing strategy.

OSL International Inc. – Senior Application Developer

November 2019 – January 2022

- Developed web applications using ASP.NET Core, ASP.NET Framework, and Angular.
- Modernized existing web applications with current frameworks.
- Scoped requirements for website enhancement requests.
- Maintained code and application quality standards across the team.
- Mentored colleagues and helped resolve day-to-day development issues.
- **Impact:** Led modernization of 5+ legacy applications; established coding standards for the development team; reduced application load times by ~50% through optimization.

Sense Software Solutions – Software Design & Development Engineer

May 2019 – October 2019

- Designed and developed web applications using ASP.NET for aviation and logistics.
- Created WCF web services and Web APIs.
- Developed Angular web applications.
- Collaborated with business architects in Singapore to coordinate requirements.
- **Impact:** Delivered an aviation logistics application adopted by multiple airlines; implemented robust WCF services handling high-volume transactions.

Lear Corporation – Software Developer Intern

June 2018 – April 2019

- Designed and developed in-house web applications using ASP.NET MVC.
- Participated in code reviews and team development processes.
- Assisted in maintaining existing applications.
- **Impact:** Converted from intern to a full-time developer track based on shipped work; contributed internal tools that improved team productivity.
